

## NEW PRODUCT RELEASE

### Comply with new Federal Tank Truck Regs

New **Ultra-Containment Berms** help meet new Spill Prevention, Control, and Countermeasure (SPCC) Plan requirements. The Berms capture small and large spills from tanker trucks, military vehicles and other heavy equipment. Patented, "drive in - drive out" sidewalls lay down when driven through, then automatically spring back to their upright position. Unique design features rugged, chemical resistant Copolymer-2000 material and can be rolled up for compact storage. Ultra-Containment Berms keep spills from entering stormwater drains while performing loading, unloading and vehicle wash applications. Available in standard and custom sizes.
